PROFESSIONAL SUMMARY

B.Tech Electronics & Communication Engineering student with hands-on experience building full-stack, real-time and data-driven applications. Skilled in React, Next.js, TypeScript, JavaScript, Python, REST API integration, geospatial visualization, data visualization, Git/GitHub and Vercel. Built and deployed production-style dashboards integrating live APIs, official emergency alerts, analytics and interactive maps. Strong analytical problem-solving skills with interests in software development, data analytics, automation and technology-driven operations.

TECHNICAL SKILLS

Programming: Python, C, JavaScript, TypeScript, HTML, CSS

Web & Frameworks: React, Next.js, Vite, Tailwind CSS

APIs & Data: REST APIs, Axios, OpenWeather API, Open-Meteo API, NDMA SACHET

Visualization & Maps: Recharts, Leaflet, OpenStreetMap, Geospatial Visualization

Tools & Deployment: Git, GitHub, Vercel, VS Code, Arduino IDE, MATLAB, Multisim

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, DSP, VLSI, PCB Design

PROJECTS

AI Bharat Emergency Intelligence Dashboard | [GitHub](#) | [Live](#)

Next.js, React, TypeScript, Tailwind CSS, Leaflet, Recharts, NDMA SACHET, Open-Meteo, Vercel

- Built and deployed an India-wide emergency command center combining official NDMA SACHET alerts with live weather intelligence and geospatial monitoring.
- Implemented Emergency Analyst, Incident Priority Queue, alert-weather correlation, historical analytics, system health, notification center, map filters, clustering and incident drill-down.
- Optimized API performance with caching, request timeouts, concurrent data fetching and state-indexed processing while keeping dashboard-derived risk signals separate from official warnings.

SkyPulse — Weather Dashboard | [GitHub](#) | [Live](#)

React, JavaScript, Vite, Axios, OpenWeather API, Recharts, Lucide React, Vercel

- Developed a responsive weather dashboard with real-time conditions, hourly and 5-day forecasts, air quality, temperature charts and geolocation.
- Added favorites, recent-search history, Celsius/Fahrenheit conversion, dark/light mode, local-storage preferences and robust loading/error states.

AI-Based Autonomous Fire Fighting Vehicle

Python, Arduino IDE, Camera/Radar Integration, Embedded Systems

- Designed an autonomous emergency-response prototype with camera/radar-based detection and independent response actions for time-critical scenarios.
- Coordinated hardware and software modules and validated system behavior through structured testing and status tracking.

Bluetooth-Based Remotely Controlled Car with Obstacle Detection

Arduino IDE, MATLAB, Radar/Sensor Integration

- Developed a Bluetooth-controlled vehicle with real-time obstacle detection and collision-prevention logic.
- Planned sensor integration, control logic and communication flow and validated performance through structured testing.

EDUCATION

B.Tech — Electronics & Communication Engineering | Pranveer Singh Institute of Technology, Kanpur | 2023–Present | 74.09%

Intermediate — UP Board | GPM SVM Inter College, Shuklaganj, Unnao | 81%

High School — UP Board | GPM SVM Inter College, Shuklaganj, Unnao | 86%

ACHIEVEMENTS & CERTIFICATIONS

- Finalist — TechExpo 2025 for the AI-Based Autonomous Fire Fighting Vehicle project.
- Solved 40+ LeetCode problems, demonstrating consistent logical and algorithmic problem-solving.
- Deloitte Data Analytics Job Simulation — Forage, May 2026
- Data Analytics — Unstop
- Exploratory Data Analysis — FutureSkills Prime (NASSCOM), June 2026
- Infosys Springboard — HTML, CSS, Python

ADDITIONAL INFORMATION

Languages: English (Fluent), Hindi (Native) | **Availability:** Open to relocation and entry-level opportunities.
